

SANOVO Performance Review

Helping You Make Informed Maintenance Decisions

The best maintenance decisions start with understanding your equipment's condition.

A SANOVO Performance Review provides a structured assessment of your equipment, helping you identify wear, prioritize maintenance, reduce unexpected downtime, and make informed decisions that support reliable production and long-term performance.

Why Choose a Performance Review?

- ✓ Understand your equipment's current condition
- ✓ Detect wear before it becomes costly
- ✓ Prioritize maintenance investments
- ✓ Reduce the risk of unexpected downtime
- ✓ Improve long-term equipment reliability
- ✓ Plan future service with confidence

What Happens During the Review?

An experienced SANOVO Field Service Engineer performs a structured on-site assessment of the agreed equipment within the defined scope.

The review may include:

- Machine condition
- Wear components
- Operational performance
- Maintenance observations
- Electrical and automation systems (where relevant)

How it Works

1. Book Your Review

Together we define the equipment and areas of focus.

2. On-Site Assessment

A SANOVO Field Service Engineer reviews your equipment.

3. Receive Your Report

You receive clear observations and practical recommendations.

4. Plan Next Step

Use the report to prioritize future service and maintenance activities.

What will You Receive?

Following the review, you receive a comprehensive Performance Review Report containing:

Equipment Condition
Current machine status.

Key Observations
Documented findings.

Our Recommendations
What should be done.

Next Steps
Suggested maintenance priorities.

Optional Quotation
Service work, repairs, or spare parts.
